

Supporting small businesses with energy bill relief

The Australian Government is providing more support for Australian small business owners.

Receive up to \$325 credit on your small business electricity bill

Eligible small businesses will receive up to \$325 between July 2024 and June 2025.

To be eligible, you must:

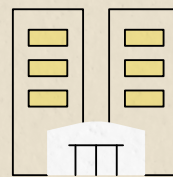

- have an active electricity account
- not operate from a residential address with a residential electricity tariff, and
- meet the definition of a 'small business' in the state or territory that your business operates in. This will be based on your business's annual electricity usage.

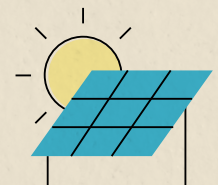

Most eligible small businesses will have credits automatically applied to electricity bills. The credit will appear as a line item on your electricity bill.

Businesses in ACT, NSW, NT, SA, TAS receive four credits of \$81.25.
Businesses in WA receive two credits of \$162.50.
Businesses in VIC receive one credit of \$325.

If your small business operates in a shopping centre, you may be in an embedded network, and may need to apply for energy bill relief.

If your small business is connected to the grid and powered by solar panels or batteries, and you have a positive account balance, you will still receive a credit on your account.
